Probabilmente l'arma preferita dal loro ideatore Samuel Colt: il Modello 1851 Navy. Fu lui a chiamarla Navy indicandone così l'uso per la marina grazie al suo calibro contenuto, il .36. Venne però venduta in maggior quantità all'esercito e divenne compagna inseparabile dei Nordisti durante tutta la Guerra Civile. Il Modello 1851 Navy Yank venne considerata tra i più brillanti revolver a singola azione grazie alla sua rapidità di estrazione e al rinculo leggero. Disponibile nelle versioni "Modello SHERIFF'S" con canna ridotta (l'arma preferita dal leggendario sceriffo di Abilene, Wild Bill Hickok), "Modello CIVILIAN" con sottoguardia e fascetta in ottone argentati, e "Modello LONDON" con sottoguardia e fascetta in acciaio come quelle prodotte appunto nella città da cui presero il nome dal 1853 al 1856.

The 1851 Navy model was probably Col. Samuel Colt's favorite. He named it Navy Model, meaning it to be used by the Navy thanks to its small .36 cal. It was instead sold in larger quantities to the Army and became the inseparable companion of the Yankees during the Civil War. The 1851 Navy Yank model was considered as one of the most brilliant single action revolvers thanks to its fast draw and light recoil. Available in the versions "SHERIFF'S Model" with shortened barrel (the favourite gun of Wild Bill Hickok, the legendary sheriff of Abilene), CIVILIAN Model, with silver plated brass backstrap and triggerguard, and the LONDON Model, with steel backstrap and triggerguard, like the ones produced from 1853 to 1856 in the city it was named after.

A Guerra inoltrata il Governo sudista si trovò a far appello al senso di patriottismo di chiunque potesse contribuire alla produzione di armi. A questa richiesta di aiuto rispose il patriota Mr. Griswold. La produzione di armi della Griswold & Grier fu subito bloccata per la mancanza di acciaio; vennero quindi utilizzate le campane delle Chiese, le impugnature di spade, le parti di cannoni. Nacquero così le Reb Confederate, con canna tonda, bascula in ottone color rosso/giallo, fascette e sottoguardia in ottone come il castello, le Reb Nord Navy con unica differenza la canna ottagonale. Per completare la gamma abbiamo introdotto le versioni SHERIFF'S e CARBINE.

Far into the war the Confederate Government was forced to appeal to the sense of patriotism of anyone who could contribute in the production of guns. Mr. Griswold answered to this help request. The gun production of the Griswold & Grier was soon stopped by the lack of steel: church bells, sword handles and cannon parts were used. Thus originated the Reb Confederate, with round barrel and red or yellow cast brass frame, brass triggerguard and backstrap of the same color of the frame and, afterwards, the Re Nord Navy with an octagonal barrel. To complete the line we introduced the SHERIFF'S and CARBINE versions.
