Nel periodo detto di "transizione", subito dopo la fine delle Guerra di Secessione, nacquero molti modelli di armi che, in varia misura, svolsero un ruolo importante nella stesura della storia americana. Una tra queste armi fu proprio la carabina Smith: molti furono i pionieri che attraversavano la frontiera armati della loro fidata carabina. La bascula incernierata permetteva una ricarica semplice e veloce persino da cavallo. La riproduzione della carabina Smith è disponibile in versione CAVALRY cl. 50, con ponticello e anello-sella, ARTILLERY, con maglietta porta-cinghia, e finemente incisa a mano.

During the so called period of transition, soon after the end of the Civil War, many weapons were originated and played a more or less important role in the American history. The Smith Carbine was one of those weapons: many pioneers ventured to the West armed with their trustworthy Smiths. The hinged breech action allowed a quick and easy reload even on horseback. The reproduction of the Smith Carbine is available in CAVALRY version .50 cal. with saddle bar ring, ARTILLERY (bm) with sling swivels and finely hand engraved.

## SHOULDER STOCK

60) **ASS44**  
ARMY SHOULDER STOCK

61) **NSS44**  
NAVY SHOULDER STOCK
