

## A NEW COOPERATION: PIETTA/DESENZANI

*Laboratorio armi Desenzani*  
*Brescia Since 1910*

The gun shop was opened in Brescia in 1910. Since the first years of activity it stood out among the crafts-men and the small gun makers of that time. Thanks to owners' expertise and astonishing manual skills, awarded the gun shop was as one of the most qualified ones in Italy.

The two owners Zulli and Gussago, a.k.a. "Golden hands", are the main characters of this workshop they produce.

Extremely worthy rifles and shotguns, following the demanding request of qualified clients.

Many years have gone by, but still now when you visit the "Desenzani" shop you can feel the atmosphere of real and old style gunsmith's workshop.

During these years more than 250 weapons have been produced, among them it is worthwhile mentioning 100 extremely beautiful side-by-side shotguns and more than 150 over and under shotguns which have no rivals in terms of production, quality of materials and style.

The weapons made by Desenzani are accurate in each detail; if you order a pair of rifles, once they are ready, they perfectly have the same weight. This precision is due to the fact that any minimal part is weighed and made in order to be sure to have exactly the same weapons.

These are things from better days!

These jewels of mechanics are then embellished by Master Engravers such as Medici, Galeazzi and Parravicini, who exalt with their engravings the soft lines of the receivers mounted on selected walnut briar stocks.

Nowadays it takes at least 12 months to produce a weapon with these features, but in the end everyone would be proud to own a perfect custom-made weapon.

The Desenzani gun shop is continuing its activity exactly with the same commitment and expertise of yore.
